

INDUSTRIAL GREASES

VEEDOL NON-SOAP GREASES

- VEEDOL ARDEN 20

DESCRIPTION

- Clay based, chemically stable grease.

APPLICATIONS

- Recommended for plain and anti-friction bearings where extremely high temperatures are encountered.

Caution: In bearings operating at temperatures above 200°C the grease should be replenished at frequent intervals.

BENEFITS

- Can withstand very high temperatures without softening or melting.

CHARACTERISTICS

VEEDOL ARDEN		20
Texture		Smooth
NLGI Consistency		2
Soap Type		Non Soap
Worked Penetration 60st @ 25°C	Min	265
	Max	295
Drop Point°C	Min	250
